This Morning in Your Garden

THE MONTH OF JANUARY January! The first month of the year. Our gardening operations should be under full way. Just as we begin the New Year we should plan and begin our gardens. Make a New Year's resolution that you are to have a bigger and better garden. Forget the past mistakes you have made in your garden but profit by them.

Spade and manure all the vacant beds and borders. Then let the ground rest and give the sun, air and rain a chance to give it new life. With this treatment and fertilizer the soil will be in good condition for spring.

Dead weeds and rubbish harbor garden pests. Clean up and this will remove a great many insects. Rubbish should be burned and crows should be taken when removing weeds, etc., so that there is little chance of scattering the garden pests. At this time many insects are in a dormant state or in the larva stage and it is better to take a little care now than to have to worry about them later on.

Just how the ants are not very active but later in the year care should be taken to get rid of them as they are the main carriers and spreaders of pests.

FERTILIZATION OF ROSES TOLD Now is the proper time to fertilize roses. In fertilizing, several things should be kept in mind.

First, do not over-fertilize nor under-fertilize. In over-fertilization two things can result. You would either burn your roses or waste your fertilizer. In under-fertilization you fail to get the maximum benefit from your fertilizer.

Second, be sure that the fertilizer used contains the necessary food elements. A competent gardener or nurseryman should be qualified to advise you on your fertilizer requirements. Some of the leading specialists in the art of plant fertilization and the necessary plant food elements needed for roses and other shrubs.

Third, proper application of fertilizer is an important factor. For

example the amateur gardener may place all of the fertilizer at the body of the stock whereas it should be distributed over the area occupied by the root system.

For the best and satisfactory results consult your gardener or nurseryman.

PANSY PLANTS ADVISABLE Pansy seeds are very hard to raise and it is advisable to buy plants instead. By doing this, better results will be obtained and the plants can be set right in the ground.

To have fine looking plants the soil must be prepared thoroughly beforehand. Many people neglect to do this and as a result their efforts are a failure. Choose a location that will get the sun at least half the day. Spade and manure the soil well, adding lime to sweeten and sand for drainage.

The plants are now ready to be placed in the ground. Mulch with sand and peat and the plants require plenty of water. In dry weather water about twice a week. Fancies make a very nice bouquet and the more of them that are picked the faster they grow.

FIVE YEARS AGO IN TORRANCE

As Told by the Files of This Paper

The chances appear to be even that the University of California's Southern Branch will be located in the Palms Verdes Hills.

A charming home wedding was solemnized Thursday afternoon, when Miss Clara Totten, daughter of Mr. and Mrs. Wm. F. Totten of 1414 Anapola avenue became the bride of James Henry Hellen, son of Mr. and Mrs. R. H. Hellen, of 711 Cota avenue, at the home of the bride.

The new Torrance Bakery, with oven capacity of 5000 loaves, began business this week at 1925 Carson street.

Rev. B. H. Lingenferer announced today that the new Christian church will be formally dedicated on February 22.

The Industrial Housing Corporation has a unique and advantageous sales plan for the transfer to occupants of the 23 houses which the company has built at Columbia Court, near the steel mills.

Torrance to Benefit by Big Expansion

(Continued from page 1) said the Edison company during the second year of a definite year program of extensive development in all of its districts. Expansion of merchandising activities is planned as well as greater construction activities. The district he said, will continue to be an important factor in the company's development.

Oil Company and Keystone Folk Confer

(Continued from page 1) for the Keystone field, but stated that in his opinion if property owners did not accept leases from his company that the field would not develop as it should.

The meeting was well attended, but some of the property owners objected that leases offered by the Archer and Signal Oil and Gas companies were not satisfactory as they did not sufficiently protect the interests of the property owners.

PAINFUL CORNS

Loosen—Lift Out

A little known Japanese herb, the discovery of an eminent German scientist, (Dr. Stickle) instantly soothes the corn, callous or wart, then loosens it so that shortly you can lift it right out. This new discovery called "Corn Fly" excites the white blood corpuscles to action and granulates the corn at its root so that it drops out and leaves no trace of scar or soreness.

You will also find "Corn Fly Foot Bath Powder" a boon for sore, tired or perspiring feet.

"Corn Fly" for corns, 35c. "Corn Fly Foot Bath Powder" 25c. and "Corn Fly Bunion Remedy" 50c. (All three—\$1.10 value—for \$1.00), are sold under a positive money-back guarantee by Hi-Gene Co., Newark, N. J., or local druggist.
